STROJEVI I MATERIJAL ZA SPIRALNI UVEZ - PERFORATING MACHINES AND BINDING SYSTEM

## ZA-10

**STROJ ZA ŠTANCANJE UGLOVA**  
**CORNERING MACHINE**

## **ZA-10**

### **STROJ ZA ŠTANCANJE UGLOVA**

Vrlo precizan stroj za stancanje papira i sl. materijala. Noževi za rezanje izrađeni su iz alatnog čelika te termički obrađeni. Pomoću vodilica na stolu namještava se udaljenost između gornjeg i donjeg noža. Pridržavanje papira tokom štancanja je automatski prilikom svakog radnog ciklusa. Radi na principu elektromotornog reduktora i mikrosklopke koja regulira radni hod stroja. Aktiviranje stroja vrši se pomoću nožnog prekidača.

#### TEHNIČKE KARAKTERISTIKE:

Visina hrpe	60 mm
Radius zaokruživanju funkcije	5, 7, 9, 11, 14, 16, 18 mm
Alat za ravno rezanje	Da
Max duljina ravne linije rezanja	28 mm
Dimenzije	390 x 280 x 310 mm
Težina	40 kg

## **ZA-10**

### **CORNERING MACHINE**

Handliness, sturdiness and reliability characterize this cornering machine that is also extremely precise. The cut made with blade and counter blade and adjustable supporting table that allow to settle the two blade shapes, ensure the perfect cut even of the last sheet. The automatic pressing device also ensures a perfect hold of the sheet during cutting. The adjustable prismatic sliding guides and the large-sized frame, entirely made of cast iron, make it extremely reliable in the course of time.

#### SPECIFICATIONS:

Height of pile	60 mm
Radius of rounding tool	5, 7, 9, 11, 14, 16, 18 mm
Tool for straight cutting	Yes
Max lenght of straight cutting line	28 mm
- Dimensions	390 x 280 x 310 mm
- Weight	40 kg
